Work Experience

VPI INFO
Kenitra, Morocco

Software Engineer — *Jun. 2023 – Present*

- **API Design & Implementation**: Built and maintained a robust Node.js (Express) API that serves as the backbone for all company applications.
- **Mobile App Development**: Developed a pointage app using Ionic and Angular to streamline employee time tracking, weight management, and other functionalities for large agricultural companies.
- **Enterprise Resource Planning (ERP) System**:
    - Developed a Vue.js commercial ERP app managing clients, sales, purchases, inventory, reporting, and other critical business operations.
    - Expanded functionality to include accounting and human resources modules.
- **Web Development**:
    - GMS Portail: Created a multi-user Vue.js web portal for worker rental companies, enabling document management, contract creation, ticketing systems, and user administration.
    - GMS Colis: Developed a Vue.js delivery tracking application with data analysis, status tracking, reviews, and Excel data upload capabilities.
- **Progressive Web App (PWA) Migration**: Migrated the pointage app to a PWA using Vue.js, enhancing its performance and user experience.

E-MARKET SOLUTIONS
Kenitra, Morocco

Email Marketing Specialist — *May 2021 – Nov 2022*

- **Optimized Email Marketing Campaigns**: Independently analyzed historical email data to identify optimal send times, leading to a significant increase in campaign performance and earning recognition as the top performing mailer within for two consecutive months.
- **Collaborative Team Player**: Proactively assisted in team decision-making to ensure the best possible outcomes for email marketing efforts.
- **Collaborated with the IT team** to ensure smooth execution and success of email marketing initiatives.
